

Unicomp Product News

Today, July 25, 2013 we are revising our 104 key chassis products and in the coming weeks we will add a 103 key chassis option.

These changes effect the UltraClassic , Classic, Spacesaver M, EnduraPro, and Classic Trackball chassis. The 104 key layout has been changed to more closely resemble the traditional 101 key layout. The size and position of the Ctrl and Alt keys on the new 104 are the same as the traditional 101. The size of the Left Windows and Apps keys has been reduced; and, the location of the Right Windows keys has changed. We have added a 103 key layout that eliminates the Right Windows key and increases the size of the Spacebar to match the traditional 101 key layout.
