

## Unicomp Product Information

The 104 key chassis products were revised and a 103 key chassis option added back in 2013.

The changes effected the UltraClassic , Classic, Spacesaver M, EnduraPro, and Classic Trackball chassis. The 104 key layout was changed to more closely resemble the traditional 101 key layout. The size and position of the Ctrl and Alt keys on the new 104 are the same as the traditional 101. The size of the Left Windows and Apps keys was reduced; and, the location of the Right Windows keys was changed. We added a 103 key layout that eliminated the Right Windows key and increased the size of the Spacebar to match the traditional 101 key layout.
